## Whether You Decide To Use NEST Or Have Another Pension Scheme

### In Mind...

Here, at Minster, we have been working closely with our Pegasus developer as well as various pension providers to ensure auto enrolment is as simple as possible for our Opera payroll users.

As a business ourselves, we understand the pressure and uncertainty that auto-enrolment has brought. This is why, since the Workplace Pensions Reform in 2012, we have been planning and organising methods in which we can help our customers with advice along the way.

The NEST Integration utility from Pegasus allows companies to create auto-enrolment information and contribution files which can then be uploaded from the NEST portal. The fundamental gain from this utility is that it is easy to use. Whilst being simple to manage, it also ensures accurate information is given to NEST and helps simplify the communication between the employer and NEST thus saving them a considerable amount of time and money.

The NEST utility is readily available from Pegasus for Opera II and Opera 3. However, we are also

aware that there are other pension providers that our customers may wish to use instead.

We have been working hard to develop different utilities for those requirements in order to achieve the very best service for our payroll users, and would like to investigate any requirements you may have. So, of course, if you are considering using a different pension provider that isn't listed below, please let us know.

Currently Available : People's Pension, Standard Life, Aegon, Scottish Life, NOW: Pensions, Scottish Widows, Legal & General  
Currently in Development: Aviva BlueSky, Zurich

# We have The Solution to Fulfil Your Auto-Enrolment Obligations

## Our Final Automatic Enrolment Event

After another successful event, we have decided to hold the auto-enrolment presentation again on 17th September 2014 at 10am.

Due to staging dates being so close, this will be our LAST event. Please ensure you book your place in advance to avoid disappointment. We, again, have limited availability and past events have been fully booked.

# Technology You Can Count On

Spring | 2014

## Still Dreaming Of A 'Paperless Office'? It Could Be Closer Than You Think With Pegasus Opera 3 Document Management!

We know how busy an office can get, especially during active times of business, so we understand you don't want to spend time searching through the filing cabinet.

With Opera 3 your documents

can be stored electronically, giving instant access. As it integrates across all Opera 3 applications, it captures the essential business documents and can securely store any type of document relating to any

transaction. The whole process cuts down on paper as well as the time spent searching through articles- making it both environmentally friendly and cost-effective.

Call us for more information.

### What YOU Thought

Richard Phillips at Spencer Manufacturing:

"I was very pleased that I took the time to come to your presentation. (Auto Enrolment Event 22/01/2014) The speech by Joanna Toon was very helpful in explaining the whole rationale of auto-enrolment. The main benefit is that I am now aware of the challenges and have the time before the 1st August 2015 to tackle them."

## Minster Is Officially A Top Pegasus Reseller

As of last month, we have been officially crowned one of the top four Pegasus resellers in the whole of the UK. We pride ourselves in the customer service we deliver and aim to achieve the highest level of software support for our customers, so it's no surprise that so many businesses either take out a Pegasus contract with us or move their existing account over to Minster. If you don't have Pegasus with us yet, give us a call and find out more reasons why so many businesses choose us.
