

Pegasus Opera 3 SQL SE (Server Edition)

Opera 3 SQL SE

A business solution for SMEs,
to help them aim much higher.

Pegasus Software's latest version now includes Payroll, Costing, Bill of Materials and Fixed Assets. Also included is the **Developers Toolkit** to ensure that any bespoke requirements you already have in your **Opera 3** system OR any **other ERP/Financial software** you may be running can be written into the latest **Opera 3 SQL SE product**, along with that all important **data-transfer** to ensure a smooth transition to the Opera 3 SQL SE system.

The next phase will also be concentrating on the addition of **CRM/Sales Pipeline Management** along with a refresh of the User Interface (**how it looks**), standard and user defined **Dashboards** to allow you to easily see and drill down on **KPI's** or other important data, **automation** within the Purchasing function (**Invoice capture** and **digital procurement**), **automatic Bank Reconciliation** to name but a few.

Opera 3 SQL SE is built on the latest **64bit Microsoft .NET** framework technologies, using **C#** and **SQL Server**, giving a true client-server experience. **Auto-scheduling** of many operations such as month-end close-downs, along with **enhanced security** features and data connectors to allow seamless integration with your **3rd party applications** (**Power BI, Excel** etc.) are all standard with the product.

Existing Pegasus Opera 3 users are able to upgrade their license at a heavily **discounted price until March 2023**. New customers can **trade-in their existing ERP** or Finance package and receive a competitive upgrade discount too.

Customer Spot-Light

CS Labels Limited are a digital label specialist based in Wolverhampton, who are celebrating their successful five-year partnership with **Minster Micro Computers Limited**.

Minster has been delighted to work with CS Labels during this time, initially being contracted to handle a series of upgrades to their IT systems and networks following their 2018 expansion to new purpose-built headquarters in the city's Steel Park Trading Estate.

Due to a further period of growth for CS Labels, the company has opened a second manufacturing site in Wednesfield, with Minster again providing a range of IT hardware and additions to their existing Pegasus Opera 3 software as they step up their global distribution of their adhesive label products.

Adam James, co-managing director at CS Labels said, "Since the start of our partnership, the team at Minster Micro have provided us with absolutely first-class advice and support on our systems and our cyber security".

"We put huge trust in the Minster team to upgrade our systems as part of our move five years ago and they provided us with a completely new IT infrastructure which meets both our current and future needs. Minster's constant support and technical knowledge is of huge value to us and it's a relationship we value greatly."

Find out how your company could be featured in our next **Spring 2023 Newsletter** by contacting your Account Manager on **01562 68211**

Our MD, Susan Marlow said, "We have loved working alongside the team at CS Labels over the past five years and providing them not only with a range of bespoke software and hardware, but also with advice around their networks and IT security.

"Given their extensive growth, with customers now spread across the world, the company knew is needed reliable, integrated systems which were also fit for the future.

"With ongoing support, we are delighted to have delivered those systems and been able to support with advice around cyber security too. To be supporting CS Labels with their latest expansion into its additional manufacturing base in Wednesfield has been another great project for us and it's a great relationship we look forward to taking into the next five years."
